

Historical Analytics provides deep payments intelligence insights highlighting performance overview, authorizations, and captures. Showing settlement by counts, amounts, and channel.

Access

Go to <https://ebc2.cybersource.com> to enter login information:

Organization Name: your Account or Merchant ID

User Name: your CyberSource credentials

Password: your CyberSource password

Expand the left navigation panel and click on **Analytics**. Under **Historical**, select **Settlements**.

Historical Analytics Settlements

Section 1 Horizontal Filtering Toolbar and Export Function

If logged in to the SSO or “_acct” level, the **Settlements** section of Historical Analytics will display default results for **Date Range: Last 7 Days**, and **Reporting As: USD**. Variations on these dimensions may be selected. Additional applied filters are located below with two default applied filters for **Transaction Status: Settlements and Chargebacks** and **Count/Amount: Count**, plus a drop-down menu to select additional dimensions to further explore. The example below shows an applied filter for **Currency: EUR**, with the drop-down menu revealing more filters that could be applied to **Settlement** results.

Horizontal Filtering Toolbar and Export Function

The screenshot displays the 'Settlements' page in the CyberSource Business Center. At the top, there is a navigation bar with 'Analytics' and a link to 'Go To Overview Page'. Below this, the page title 'Settlements' is shown. The main content area features a horizontal filtering toolbar. It starts with 'Showing results for' followed by two filter buttons: 'Date Range: Last 7 Days' and 'Reporting As: USD'. Below these are three filter buttons: 'Settlements And Chargebacks', 'Count/Amount: Count', and 'Currency: EUR'. To the right of these buttons is a 'CLEAR FILTERS' button. A dropdown menu is open under the 'Choose a filter' label, listing several dimensions: 'Billing Country', 'Processor', 'Integration Method', 'Payment Channel', and 'Payment Type Method'. An 'EXPORT' button with a download icon is located in the top right corner. Four callout boxes provide instructions: 1. A range of dimensions available for additional applied filters (pointing to the dropdown menu). 2. Clicking the 'X' removes the selected filter, differentiated by the darker shade of blue (pointing to the 'Currency: EUR' button). 3. Select Clear Filters to remove any darker blue applied filters and to revert both applied filters to default states – this action will not alter selections for Date Range and Reporting As filters (pointing to the 'CLEAR FILTERS' button). 4. Export the data with applied filters as a .csv or .json file (pointing to the 'EXPORT' button).

Section 2 My Business Analytics for Settlements and Chargebacks

The left side of this section shows a **Summary** table with line items for **Settlements** and **Chargebacks** with **Percentage of Total Count** and the rate in the selected date range. A text link to **Show Top 3 Currencies** expands the table to reveal the next two currencies with the most settlements and chargebacks.

The right side of the section shows the **Settlements and Chargebacks Summary** bar chart with a default **No Split** share view. Selecting categories from the drop-down menu displays dimensions that can be revealed by hovering over their respective legends. Hovering over any category in a legend brings focus to that category in each bar. Clicking on a legend category makes it unavailable and temporarily removes the content from the display. Clicking again on the category restores the content to its original state.

My Business Analytics for Settlements and Chargebacks

Change the date range by using the horizontal filtering toolbar

View top three settlements by currencies

Select a bar to display settlement count

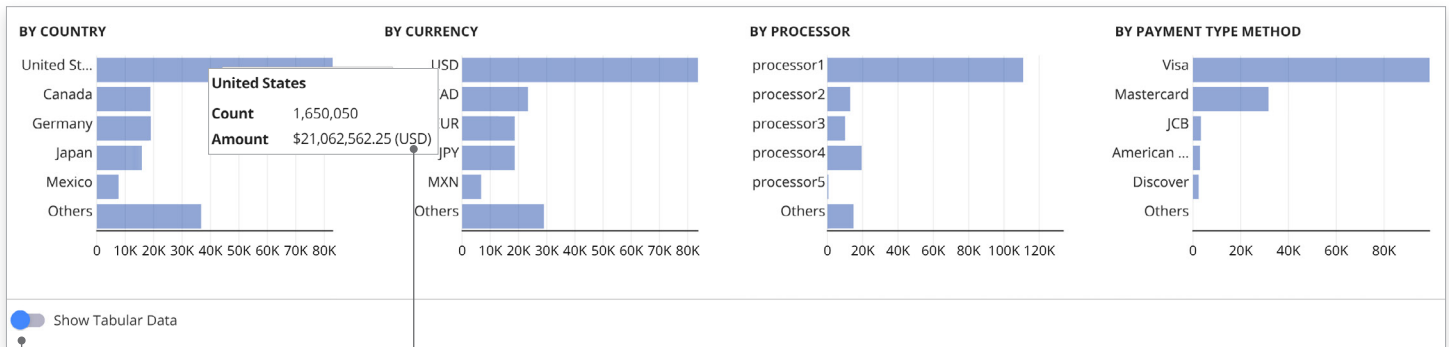

View shares in the bar chart by other dimensions, selecting them in the legend will display them in the graph

Select the **Show Percentage Change** toggle to display data in a span chart

Section 3 Comparisons for Settlements and Chargebacks

A series of four bar charts showing comparisons by **Country**, **Currency**, **Processor**, and **Payment Type Method**. Hovering over any bar in a chart displays a pop-up for **Count** and **Amount** for that category. Selecting the **Show Tabular Data** option below the bar charts reveals the **Settlement Summary Data** for Settlements and Chargebacks.

Comparisons for Settlements and Chargebacks

Click the toggle or label text to reveal an additional table below this section

View **Count** and **Amount** pop-ups for bars in each chart

Section 4 Settlement Summary Data for Settlements and Chargebacks

Clicking the **Show Tabular Data** toggle moves it to the right and reveals a table with all dimensions used to display the data. Selecting the arrows next to each header displays the data in alphabetical order from A to Z or Z to A. Filter fields below the header allow searching within the category. The header area scrolls horizontally to reveal more dimensions.

Settlement Summary Data for Settlements and Chargebacks
