

CyberSource Payment Management FOR MAGENTO 1

The CyberSource Extension for Magento 1 provides a comprehensive, scalable eCommerce and payment management solution helping to give businesses the flexibility to create rich consumer experiences and grow their online revenue.

Pre-developed Magento 1 Extension*

The CyberSource Payment Management Extension for Magento 1 can help increase speed to market and reduce system development and maintenance costs. Increased automation enables streamlining of the checkout and payment management process and can reduce the cost and complexity of running eCommerce operations.

Drive Revenue Growth

Increase opportunities for sales conversion using the latest payment management techniques. Implement fraud management strategies to help accept more genuine orders.

Helps with Faster International Expansion

Gain access to integrated systems, tools and resources increasing your ability to expand internationally and address new markets quicker, safer and more efficiently. Worldwide presence providing local expertise and guidance from in-country insights.

Improve the Checkout Experience

Provide a simplified customer payment experience with a responsive, single page checkout to help convert more browsers into buyers.

Offer Multiple Payment Methods

Help reduce checkout abandonment by offering customers a choice of payment methods including credit and debit cards and Paypal Express Checkout.

Accept More Orders, Gain Greater Protection

Gain greater protection from fraud and payment data theft with access to the World's Largest Fraud Detection Radar, powered by 68 billion CyberSource and Visa Inc. transactions processed annually.

Keep Customers Safer And More Secure

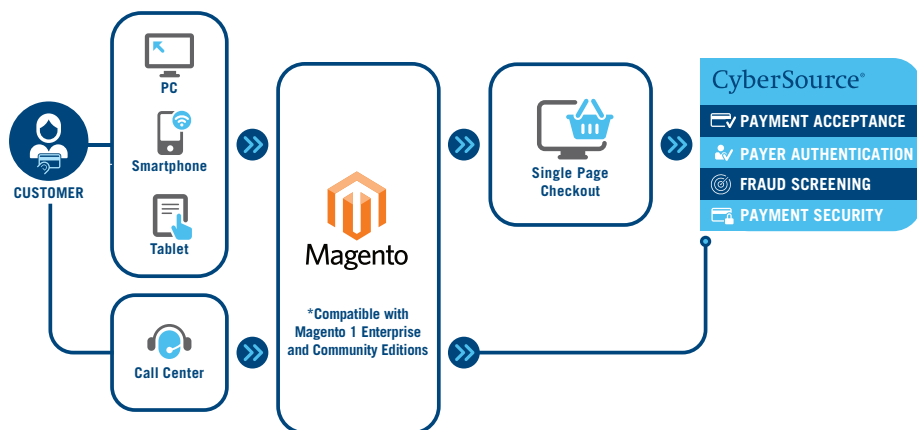

Help protect your network and customer data from increasingly sophisticated threats. Reduce PCI DSS scope by not handling or storing payment card data. Part of Visa Inc. network, world renowned for security and reliability.

Mobile Friendly Shopping

Deploy mobile optimized payment pages for easy, safe and secure mobile shopping.

Magento and CyberSource – Get Started Fast

The CyberSource Payment Management Extension for Magento 1 can help to shorten the implementation cycle and reduce development costs while still providing flexibility for customization. The extension provides all the key features for the CyberSource Payment Management Platform and is compatible with Magento Community and Magento Enterprise.

*Compatible with Magento Enterprise 1.11, 1.12, 1.13 & 1.14 and Magento Community 1.7, 1.8, 1.9
