

CyberSource extension for Magento 2

Secure payment management for a leading eCommerce platform

A powerful partnership

Magento 2 is a leading eCommerce platform. Developed by an Open Source community of developers around the world, it's used by more top retailers than any other eCommerce solution.¹ Now CyberSource's secure payment platform can easily be built into Magento 2. That's because our Magento 2 extension cuts down the time and effort required.

Ultimately, the CyberSource extension for Magento 2 will make on-boarding much easier for your organization. Plus, help you reduce your development and maintenance costs.

Magento Commerce was named a Leader by Gartner Inc. in the 2018 Magic Quadrant for Digital Commerce.²

A platform to support growth

CyberSource and Magento 2 can help you reach more customers across the world. Together, we can help you to increase business revenue and provide a better customer experience. What's more, CyberSource is built on the strength and reliability of Visa's data network. This network offers end-to-end payment security solutions to support a wide range of payment methods and channels.

Magento 2 and CyberSource

– you can get up and running quickly

Customer request

Magento®

CyberSource®
A Visa Solution

¹ 68 billion worldwide transactions processed annually by Visa and CyberSource.

Pre-built integration

The CyberSource Global Payment Management Extension for Magento 2 makes the technical side of things far less complicated. And it means you can keep deployment time and disruption to a minimum. So, you'll be up and running quickly to see a much faster return on investment.

Global payment processing

You can securely process payments in many countries and territories. We'll help you to expand and reach new markets around the world in a fast, safe and efficient way. Centralized reporting makes reconciliation easier. Plus, you'll be able to accept payments in over 40 currencies, and your customers can check-out in 25 languages.

Fraud protection

Your organization and customers will be protected from fraud and data theft. CyberSource Decision Manager features the world's largest fraud detection radar. It's powered by insights and data from more than 68 billion transactions. These are the transactions that are processed throughout the world by Visa and CyberSource every year.

Data protection

CyberSource Tokenization and Secure Acceptance services remove sensitive data from your environment. This will help you to reduce PCI DSS scope.

The pre-bundled extension

The extension is currently available on the Magento 2 marketplace. So, people downloading Magento 2 can easily configure the extension with their existing or new Magento 2 set up.
